Big Data AI & Cybersecurity | reynaldusjasona@gmail.com | +6580161714 || [Portofolio](#) | [LinkedIn](#) | [Github](#)

EDUCATION

University of Wollongong x SIM GE | Bachelor of Computer Science (Big Data AI, & Cyber Security)

GPA: 3.7/4.0

Oct 2023 – Oct 2026

Relevant Coursework: Algorithms and Data Structures, Advanced Programming (C++), Database Systems, Software Development Methodologies

Leadership & Involvement: **Logistics Director** for orientation event (500+ participants) | PR for **Peduli Kartini** charity (raised SGD 30,000+) | **Student Ambassador** at SIM Global Education

EXPERIENCE

Kedutaan Besar Republik Indonesia Singapura (KBRI)

Jan 2026 – Apr 2026

Sosial & Cultural Affairs Intern

Singapore, SG

- Coordinated cross-functional operations for diplomatic events and cultural programs, liaising between internal departments and external partners to ensure on-time delivery.
- Managed document workflows for official correspondence e.g. drafted invitation letters, organized procurement-related records and maintained filing systems for diplomatic operations.
- Supported planning and on-site execution of official visits and delegations, handling scheduling, resource allocation and vendor coordination.

Badan Pengawasan Pemilihan Umum RI (BAWASLU)

Jan 2024 – Feb 2024

Overseas Election Supervisor (PANWASLU)

Singapore, SG

- Supervised end-to-end polling station operations for Indonesia's overseas national election, ensuring compliance and smooth on-site execution under tight timelines.
- Managed real-time logistics and resource flow on election day e.g. coordinated committee communication, voter queue management and rapid operational problem-solving.

PROJECTS

StockWise AI |ML-Based Forecasting & Analytics Platform

Apr2026 - Present

- Building a stock forecasting web app using Python/FastAPI backend serving ML predictions through REST APIs to a Next.js/React frontend with interactive dashboards.
- Implemented Stripe payment integration for premium subscription tiers, handling checkout sessions, webhook events and subscription lifecycle management
- Designed data pipelines for preprocessing, model evaluation, and real-time analytics served via structured API endpoints.
- **Technologies:** Python, Next.js, React, Machine Learning, Stripe, Vercel, FastAPI, Supabase, PostgreSQL

Surat | Vendor Event Management Platform

Completed

- Built a consumer platform for Southeast Asian events (weddings, gatherings) with digital angpao, photo galleries, gift registries, and Apple/Google Wallet pass invitations
- Integrated Stripe for payment processing including digital angpao transfers and event service payments across multiple user roles
- Developed RBAC for four user types with Supabase Auth and middleware-level permission enforcement.
- Coordinated a three-person team using spec-driven development (requirements → design → tasks) across parallel feature models
- **Technologies:** Next.js 14, Supabase, Prisma ORM, Tailwind CSS, shadcn/ui, Resend, Vercel, Stripe

TECHNICAL SKILLS

- **Languages:** JavaScript, SQL, HTML/CSS, C++, Python,
- **Technologies:** Next.js, React, REST APIs, Git, GitHub, Machine Learning, FASTAPI
- **Tools:** VS Code, Google Colab, Xcode, Filmora, Adobe Premiere Pro, Microsoft Excel, Google Sheets
- **Spoken Languages:** Indonesian (native), English (IELTS Band 7.0), Chinese (learning), Italian (learning)
